DJ ENTERTAINMENT

Todd Urban offers full service DJ entertainment to the NJ/NYC areas. The role of a DJ goes beyond providing the music. An experienced DJ controls the flow of the party by establishing the proper mood for your event, while acting as a host to ensure that people are in the right spot at the right time.

USE OF LIVE MUSICIANS

Our ability to provide a live ensemble to the event allows for the best of both worlds by being able to supply both DJ services along with live music. The flow of your event will never stop as a small ensemble transitions into a set of your favorite dance music or current hits. Our DJ and assistant team is professional from their classy attire to their ability to host your event in a way that is exciting while retaining a sophisticated atmosphere.

STATE OF THE ART EQUIPMENT

We only use the best in equipment through the use of Newmark Hard Drive based DJ equipment that ensures that a song never skips and the flow of the event never stops. Our amplification is provided by QSC, the industry standard for the best sound available. With experience in sound engineering, your party will sound the best it possibly can in the provided venue. Lastly, our setup is clean and professional looking without the distracting visual or dangerous tripping hazard of unnecessary exposed wires.
